

Motivation

During the 2020 year we are planning to start creating a human-like full scale robot based on an open source solution. For this activity we are going to make a team 5-15 (probably growing) people extending the robot bit by bit. The activity is supposed to gather people interested in robotics and have hands-on group experience in creating a robot from scratch.

PIAN

Dates	Activity	Approximate Cost
JAN-FEB 2020	Right Hand and Forearm	700Kr
MAR-APR 2020	Left Hand and Forearm	700Kr
SUMMER 2020	Body	1000Kr
SEPT-NOV 2020	Head	1200Kr

LEGS UNDER DECISION, can be wheels, can not be anything

Further improvements

After the robot is ready it's functionality can be significantly improved powered with modern technologies such as computer vision, voice recognition and artificial intelligence.

FUNDINGS

So far we don't have sponsors to support the project.
